Microfinance Management System

Run Online or Offline

We have several versions of the software. You can run it as an offline software or access using your browser.

Run on Any Device

Our software works on almost all devices like desktop, mobile & tablets and adapts to different screen sizes.

Management Dashboard

You will have a dashboard with an overview of total members, total loans, cleared loans, total branches, active members, active loans, outstanding loans, total employees etc.

Member Management

Another section provided within this software is the member section. In the member section, the administrator can add members with detailed information. The administrator can update the information when necessary.

Deposit Management

You can set different deposit account settings for the management of your client's funds on mutually advantageous terms. You can customize at your discretion including fixed-term savings deposits, minimum deposit amount, currency, interest rate, deposit term and withdrawals etc.

Loan Management

In the loan section of this system, three sub-modules are provided: loan applications, active loans, and pending loans. In the loan request section, the administrator can add a loan request. This loan application can also be updated or removed if necessary.

Auto-fine on Defaulting Loans

One of the features in the MFMSBD software is the provision of automatic fine on defaulting loans. The fine amount is visible in the software.

Notification for Defaulting Loans

MFMSBD has features to notify you and your loan holder about the due of defaulting loans.

Accounting Management

MFMSBD comes with an accounting management feature as well. This helps your organization to keep track of all income, expenses, and other financial transactions. It also assists you in obtaining the data to make business decisions.

Income Management

You earn any income apart from the activities of your organization. By opting for the income option, you can add it to the total income of the organization very easily.

Expense Management

Easily record & manage information on daily expenses and then view daily/weekly/month/annual report on that.

Multiple Branches

The user can create multiple branches in this system and it automatically inherits the operational features. Whereas it has separate accounts for each organization.

Report Management

One of the great features of this software is the reports. This section shows loan reports, income reports and payment reports. As to keep track of all the records and requests is important, the reports section has made it easy to manage all the records.

Various Reporting

MFMSBD gives you many ways to visualize and analyze your data, some in the form of a table and some in the form of a graph.

Cash Opening & Closing

Easy to assign an opening balance to any user of your admin panel or they can do so by themselves during the beginning.

User Management

Able to open a new user ID for your organization, and the user can select a position or capacity, such as admin, editor or manager and also many more opportunities available here.
